

academics. something that we're not only good at, **but excel at.** AP Calc BC, AP Physics, and AP Lit all in one day? not a big deal; we make it work. college scholarships? we get those in abundance. amateur physicists engineering ways to drop eggs off the roof without a dent? **simple.** three hours of AP Chem? that's what we signed up for.

students here take up to six AP classes a semester. seems impossible? not for us. **we push the boundaries of what's possible.** ever heard of someone with a 5.0 GPA within one semester? students at the top of the 2019 class, such as **Erin Sullivan (12)** and **Katie Salmon (12)**, make that impossible a reality. **here, it's no big deal.**

Chemistry class completes a lab in order to observe the properties of salt and light frequencies. The class has been working on atomic models and properties of light recently. "I loved the lab; it was really fun getting to see all the different colors!" said **Olivia Reichardt (11)**.

# academics?

yeah, it's no big deal.
