

TRIM LINE

ECHO *with* HARMONY

Harmony is the blending of sounds to create a much united chord. Similar to the way sounds unify, the voices that echoed throughout the halls blended and made a strong, cohesive voice. The excellence of our student body was expressed through harmony, laughter, persistence, and prosperity. Students came together through athletics, arts programs, community service, academics, and music. Looking back on his experience, **John Stegner '21** recalled, "My music has helped me grow immensely as a person and I think that other people have been affected because it gets people out to see concerts and brings people together." John, like many other students, have unique passions that help harmonize the student body.
