### WINTER WEATHER CALLS FOR SNOW DAYS AND DELAYS

### TOO COOL FOR SCHOOL

### LENDING A HELPING SCRAPE

After an early morning snow storm, Cole Adams '19 scrapes the snow off of cars in the student parking lot, Jan. 24. Adams noticed a car next to his covered in snow, and took the time to scrape off a stranger's car after his own. "I cleaned off the car because I wanted to do something nice for them so they wouldn't have to do it when they came out because it was really cold outside," Adams said.

After a long weekend, the district closed for the first snow day of the year, Jan. 22, because of dangerous conditions. The roads were too icy for Darby Jester '22 and her sister to drive the next day, and they had to find other means of transportation. "I thought the snow day was very helpful because I didn't do my homework and it was nice to relax and sleep in," Jester said, "But, when we came back, everything we missed was all clumped into one day."

# WE INTERACT

# STUDENTS GET THEIR HANDS DIRTY

To learn the parts of the circulatory system, Susmitha Ponnapolli '20 dissects a pig's heart in Human Anatomy using a scalpel, Jan. 28. The class gave students a hands-on approach to learning the parts of the body by doing blood typing labs, sheep's brain dissections and minx dissections, that help Ponnapolli prepare for her future career in medicine. "My favorite part of the lab was being able to actually feel all of the chambers and blood vessels which made the unit a lot more tangible," Ponnapolli said.

As part of a project that allows students to sculpt what they want, Adam Navo '19 creates a small temple out of clay in Sculptures 1, Jan. 29. Navo planned to make a big bird out of stone for his next project, which incorporated new mediums. "My favorite part is being able to make whatever is in my mind and make it 3D, and express yourself through art,

Taking time out of lunch to study in the hallway, Ale Basile '22 catches up on her Biology homework, Jan. 24. To prepare for her more demanding classes, Basile created her own study guides and note cards. "As compared to middle school, high school homework isn't that much harder for me as long as I study," Basile said.

## DIGITAL DUEL

After school in room 4129, the E-sports Club gathered to play online games. Sponsored by Kyler Barker, the club formed two years ago by a student that reached out and acknowledged Barker's love of video games with the idea to

"In E-sports we have multiple teams that play different games (like lvy League) and (League of Legends). We have a season coming up which is pretty much like a sports season,"

At the club meetings, gamers practiced to see who was the champion in different video games and who qualified for the state championship.

"Honestly, just showing up to play video games is the best part along with being with all of your friends and working hard," Fernando Valdez '21, club president, said.

### MARCH TOGETHER

Every year after President Trump's inauguration in 2017, the Women's March protest is held in the streets of Downtown Denver. Alongside 150,000 other protesters, students Jana Seal '20, Maddie Provost '20, Kinley Rex '20, Jenna Veta '20 attended to show support for women's rights, Jan. 19.

"I went because I think it's important to

empower each other, especially during a time where there are a lot of allegations coming out," Seal said, "I think that coming together and making sure we are sharing compassion for people that are struggling is necessary."

At the end of the event, Seal witnessed a

counter-protest group and took the time to speak with them.

"It was really beneficial for me to hear the opinion of the other side, and it was nice for everyone to have a real conversation. I hope that more people can learn to understand both sides so that we can come to an agreement," Seal said. PHOTOS: M. PROVOST
