

ON THE SPOT. Attempting to break the current tie, Rhiannon Danborn (8) proves her point against the opposing side. Arguing John Brown's role in Antebellum America, the tie breaker ultimately ended in another draw. "It was fun to be able to showcase our learning and understanding of the concepts we learned in class," said Danborn.

"I liked the labs
in science because
they are more
hands on."

-Molly Nelson (7)
-In regard to her 4th period science class.

UP CLOSE. After working the mechanics, Sam Bierbrauer (7) identifies single cell organisms under a light microscope. "It was really fun because it was our first time looking through a microscope, and it was interesting to see things up close," claimed Bierbrauer. **THE ASSIST.** With the guidance from math teacher Mrs. Shealy, Luke Dantinne (7) and Wyatt Holtman (7) get a little help in understanding their assignment. "I really like finally finishing a problem and getting it right," said Dantinne.
