

**1. TOGETHER**, Gunner Sorrel and Ava Smith, 06, dissect a squid in Mrs. Kendy Blake's science class. In this lab, students identified the different parts of a squid. "The most interesting part of the lab was seeing all the different parts of the squid," Smith said. *photo by k. mcgarvey* **2. HITTING THE RIGHT NOTES**, Braeden Snow, 08, practices the trumpet in Mr. David Eiler's band class. "I will most likely play band in high school because I enjoy hanging out with friends and playing the trumpet," Snow said. *photo by a. lux-offermann* **3. IN A JOINT SOCIAL STUDIES CLASS SIMULATION**, Macie Miller, Noah Wills, Skyler Tran, Cielo Melvin,

Skylar Philpott, Keri Thompson, Gia Han Audrey Nguyen Le, Brayden Polick and Jack Robledo, 07, learn that for many developing countries, scarcity of water is the norm. "We lined up and took turns taking cups and getting water and dumping it into the graduated cylinder," Melvin said. "In India, they have to walk miles and miles to get water. It helped us understand that the world is different. Some people have to walk far for water, while other people can get it anywhere. We're kind of spoiled. We just turn on the water and waste it." *photo by j. nguyen*

**4. PERCUSSIONIST**, Lydia Aylward, 06, accompanies the musicians as they rehearse in band. "My favorite part of band is being able to learn new music because it is more fun to learn something new than repeat something old," Aylward said. *photo by a. geddes* **5. EXPERIMENTING**, Leah Danielson, 06, performs a hands-on lab during hybrid learning in Ms. Leigh Goerke's science class. In the lab, Danielson and her classmates determined which side of the penny held more water drops. "Science is one of my favorite classes because there is more hands-on learning than other classes. I also enjoyed that we get to work by ourselves on certain labs," Danielson said. *photo courtesy of l. goerke*

**"I BELIEVE THAT LANGUAGE ARTS IS IMPORTANT BECAUSE WORDS MATTER. SO MUCH OF OUR EDUCATION BOILS DOWN TO WHAT WE READ, WHAT WE WRITE AND WHAT WE THINK."**

# WALK FOR WATER

**G**OING OUTSIDE FOR THE CLASS PERIOD had its perks, especially when students learned the value of water in the process. Seventh grade social studies classes ventured outdoors to participate in a "Long Walk for Water" activity.

"The activity shows students the concept of water scarcity in our economics unit. During the activity, we discussed the inaccessibility of fresh water for much of our world's population. Students had to journey to a 'far away well' to collect water and bring it back to their 'village'," Ms. Lisa Calkins, social studies teacher, said.

Fellow 7th grade social studies teacher, Mrs. LeeAnne Sheets added, "I think students learned not to take water for granted, especially clean water."

## BETTER OUTSIDE

TEACHERS HOST CLASSES OUTSIDE DURING HYBRID LEARNING TO PROVIDE BREAKS FOR STUDENTS

**ON MOST DAYS WITH HOSPITABLE WEATHER**, teachers took students outside during hybrid learning, allowing for mask breaks. Finding a comfortable place in the shade, Mae Hebbert, 06, relocated outside to complete a math

assignment in Mrs. Christy Dupen's class. "My favorite part of being in Mrs. Dupen's class is being able to go in the library and do other fun activities in class," Hebbert said. *photo by m. delachapelle*
