GRANT LARSON

does BASEBALL

Q What is something that you are passionate about and how has it been affected by Covid-19? How have you pushed through those effects?

A Baseball is life. I've been playing for 5 years and have never loved the game less. Covid-19 has effected our practices, we only have to wear masks when we are inside the facility and put on hand sanitizer when we enter. Games function as normal except for the end, we can not shake hands with the other team. We pushed through by waving hats and saying good game from across the diamond, and by sanitizing equipment after we use it.

MEGAN CONAWAY does CHEERLEADING

Q What is something that you are passionate about and how has it been affected by Covid-19? How have you pushed through those effects?

A I have been doing cheer since i was 9 years old and worked very hard to get to the level i am at now. COVID-19, has made one of the biggest impacts on cheerleading that I have ever seen. a lot of cheer teams travel for competitions, where as now that is cut back to its minimum. It has also affected how we practice and were we practice. Cheerleading is a lot different with COVID-19.
