

TEEN TECH

These days, technology is all around us. Technology is in our classrooms, in our homes, and even in our pockets. But every once in a while, that technology stops working. That's where Teen Tech comes in. This group of students helps keep the technology in our school working smoothly and consistently. From projectors to wi-fi routers, Teen Tech also has access to fanciest toys that this modern age has to offer. Some recent additions include a full size poster printer, a 3-D printer, and a 3-D scanner. Thanks to the efforts from Teen Tech, the various technologies in our school are able to continue thriving. The Teen Tech team is led by Mr. Sweizer, and under his teaching, student are able to expand their creativity, participate in various personal projects, and learn everything they need to know about tech support and how devices work. Projects in the past that students have taken part in include designing and building an amp from scratch, building a playable arcade machine, 3-D printing objects scanned with a 3-D scanner, and printing store quality posters. When it comes to fancy devices and cool technology, Teen Tech is the place to be.

The Teen Tech Crew- Pictured above are the Teen Tech crew of AHS. They have the cumulative job of tech support and of having fun in general with the wide array of technology that the class has to offer.
