**Practicing New Skills-** Marc Gerald De Guia (above) focuses as he uses the soldering tool. He was given spare parts to practice on and work with. Prior to this picture, Marc had dismantled an electrical box so he could practice soldering small pieces onto delicate circuitry, a crucial skill in Teen Tech.

New Technology- Brandon Reveles scans Isaiah Avila (above) with the brand new 3-D scanner in order to get a visual model on the computer. This device is capable of scanning any object and sending the scans over to Teen Tech's 3-D printer to get a small-scale version printed out.

Gaming Fun- Carlos Chairez-Castanon (left) practice his Tetris skills on the arcade machine built by a previous Teen Tech class. The arcade machine offers a variety of games including Tetris and Pac-Man, and they are available to play for all students.

Inside Teen Tech

Poster Printing- Brandon Reveles (right) ensures everything is operating smoothly as Teen Tech's poster printer works its magic. The poster printer is among the newest toys added to Teen Tech's collection, capable of printing full size, story quality posters on glossy poster paper. It is one of the newer devices accessible for the class to use and they are still figuring out how to fully use it, but the opportunity to be able to work with such a device is astonishing.
