WHAT MAKES OUR SCIENCE CLASSES SPECIAL?

Our science classes are unique in comparison to other higher educational schools because of our Physics and Chemistry departments. Students have the mindset, ability to take risks and capability to determine if its been done before then we can do it.. In classes like Biology students are taught with real local world problems. In Environment students become more aware to our ecosystem and have the knowledge to solve any problem that harms our ecosystem.

ABOVE Tobin Davis (9), Kayla Curtin (10), Arili Brown (10), and Adrian Rich (10), are observing how a can can be crushed in different condition in a crushing can experiment.

ASK A STUDENT

What was your favorite part in your science class?

Aiden Bennett (10)
"My favorite lab experiment in physics was probably the flame tests and chemicals."

TRIM LINE

SCIENCE

For students looking for a more hands on experience, Odyssey provides just that with its science classes. With almost field of study under the sun, both the faculty and student body are sure to have learned something new with and interesting experiment.

ABOVE Mrs. Madsen (Instructor), our beloved chemistry and physics teacher has been awarded the class Nobel educator of distinction certificate. and will be applying for the educator of the year program. and was put into the best of the springs program.

Mrs. Alexandra Madsen

Dr. James Owino

Ms. Cindy Powell

"I've been teaching at odyssey since 2020. I've been teaching with a masters in chemistry. My favorite part of physics and chemistry was teaching students my classes can be fun and a great experience."

**Physics and Chemistry
Instructor**

"I've been teaching at Odyssey since 2013. I've been teaching with a bachelors of science in agriculture degree and a masters degree and a PHD in soil and water management. My favorite part of teaching was the discussions with students that show they were focused on a subject."

**Environment Science
Instructor**

"This is my first year teaching at Odyssey, I teach with a masters degree in biology and chemistry. My favorite part about teaching biology was teaching students that biology is relevant to kids."

Biology Instructor

Dehzi Davila (10)

"My favorite experiment for chemistry was the wonder lab where it had multiple labs in one kit."

Savanna Linn (10)

"My favorite lab experiment for physics that I remember would be the making of catapults."

Crae Murray (10)

"My favorite lab experiment for physics was the flame test where we saw changes in the flames."

Walter Hart (10)

"My favorite lab was the fire lab where we set different chemicals on fire to see the colors change."
