

switching CONTROLS

In Esports with Jed Palmer, staff, students were having a gaming tournament to test their skills.

"I picked Rocket League over Brawlhalla because it requires more technique and it's less boring to me than Brawlhalla."

Cayden Zickel, 07

"The game I chose was Brawlhalla because it's more like SuperSmash Bros and because I practice it at home with friends."

Claire Witaschek, 08

"For the tournament I picked Brawlhalla because I was better at it and the tournament was based on skills and how well you could play the game."

Colby Fast, 08

"I picked Rocket League out of the two options because I have more experience with it."

Alessandro Rivas Montes, 08

"I chose Brawlhalla because you can play with your friends and it's more fun."

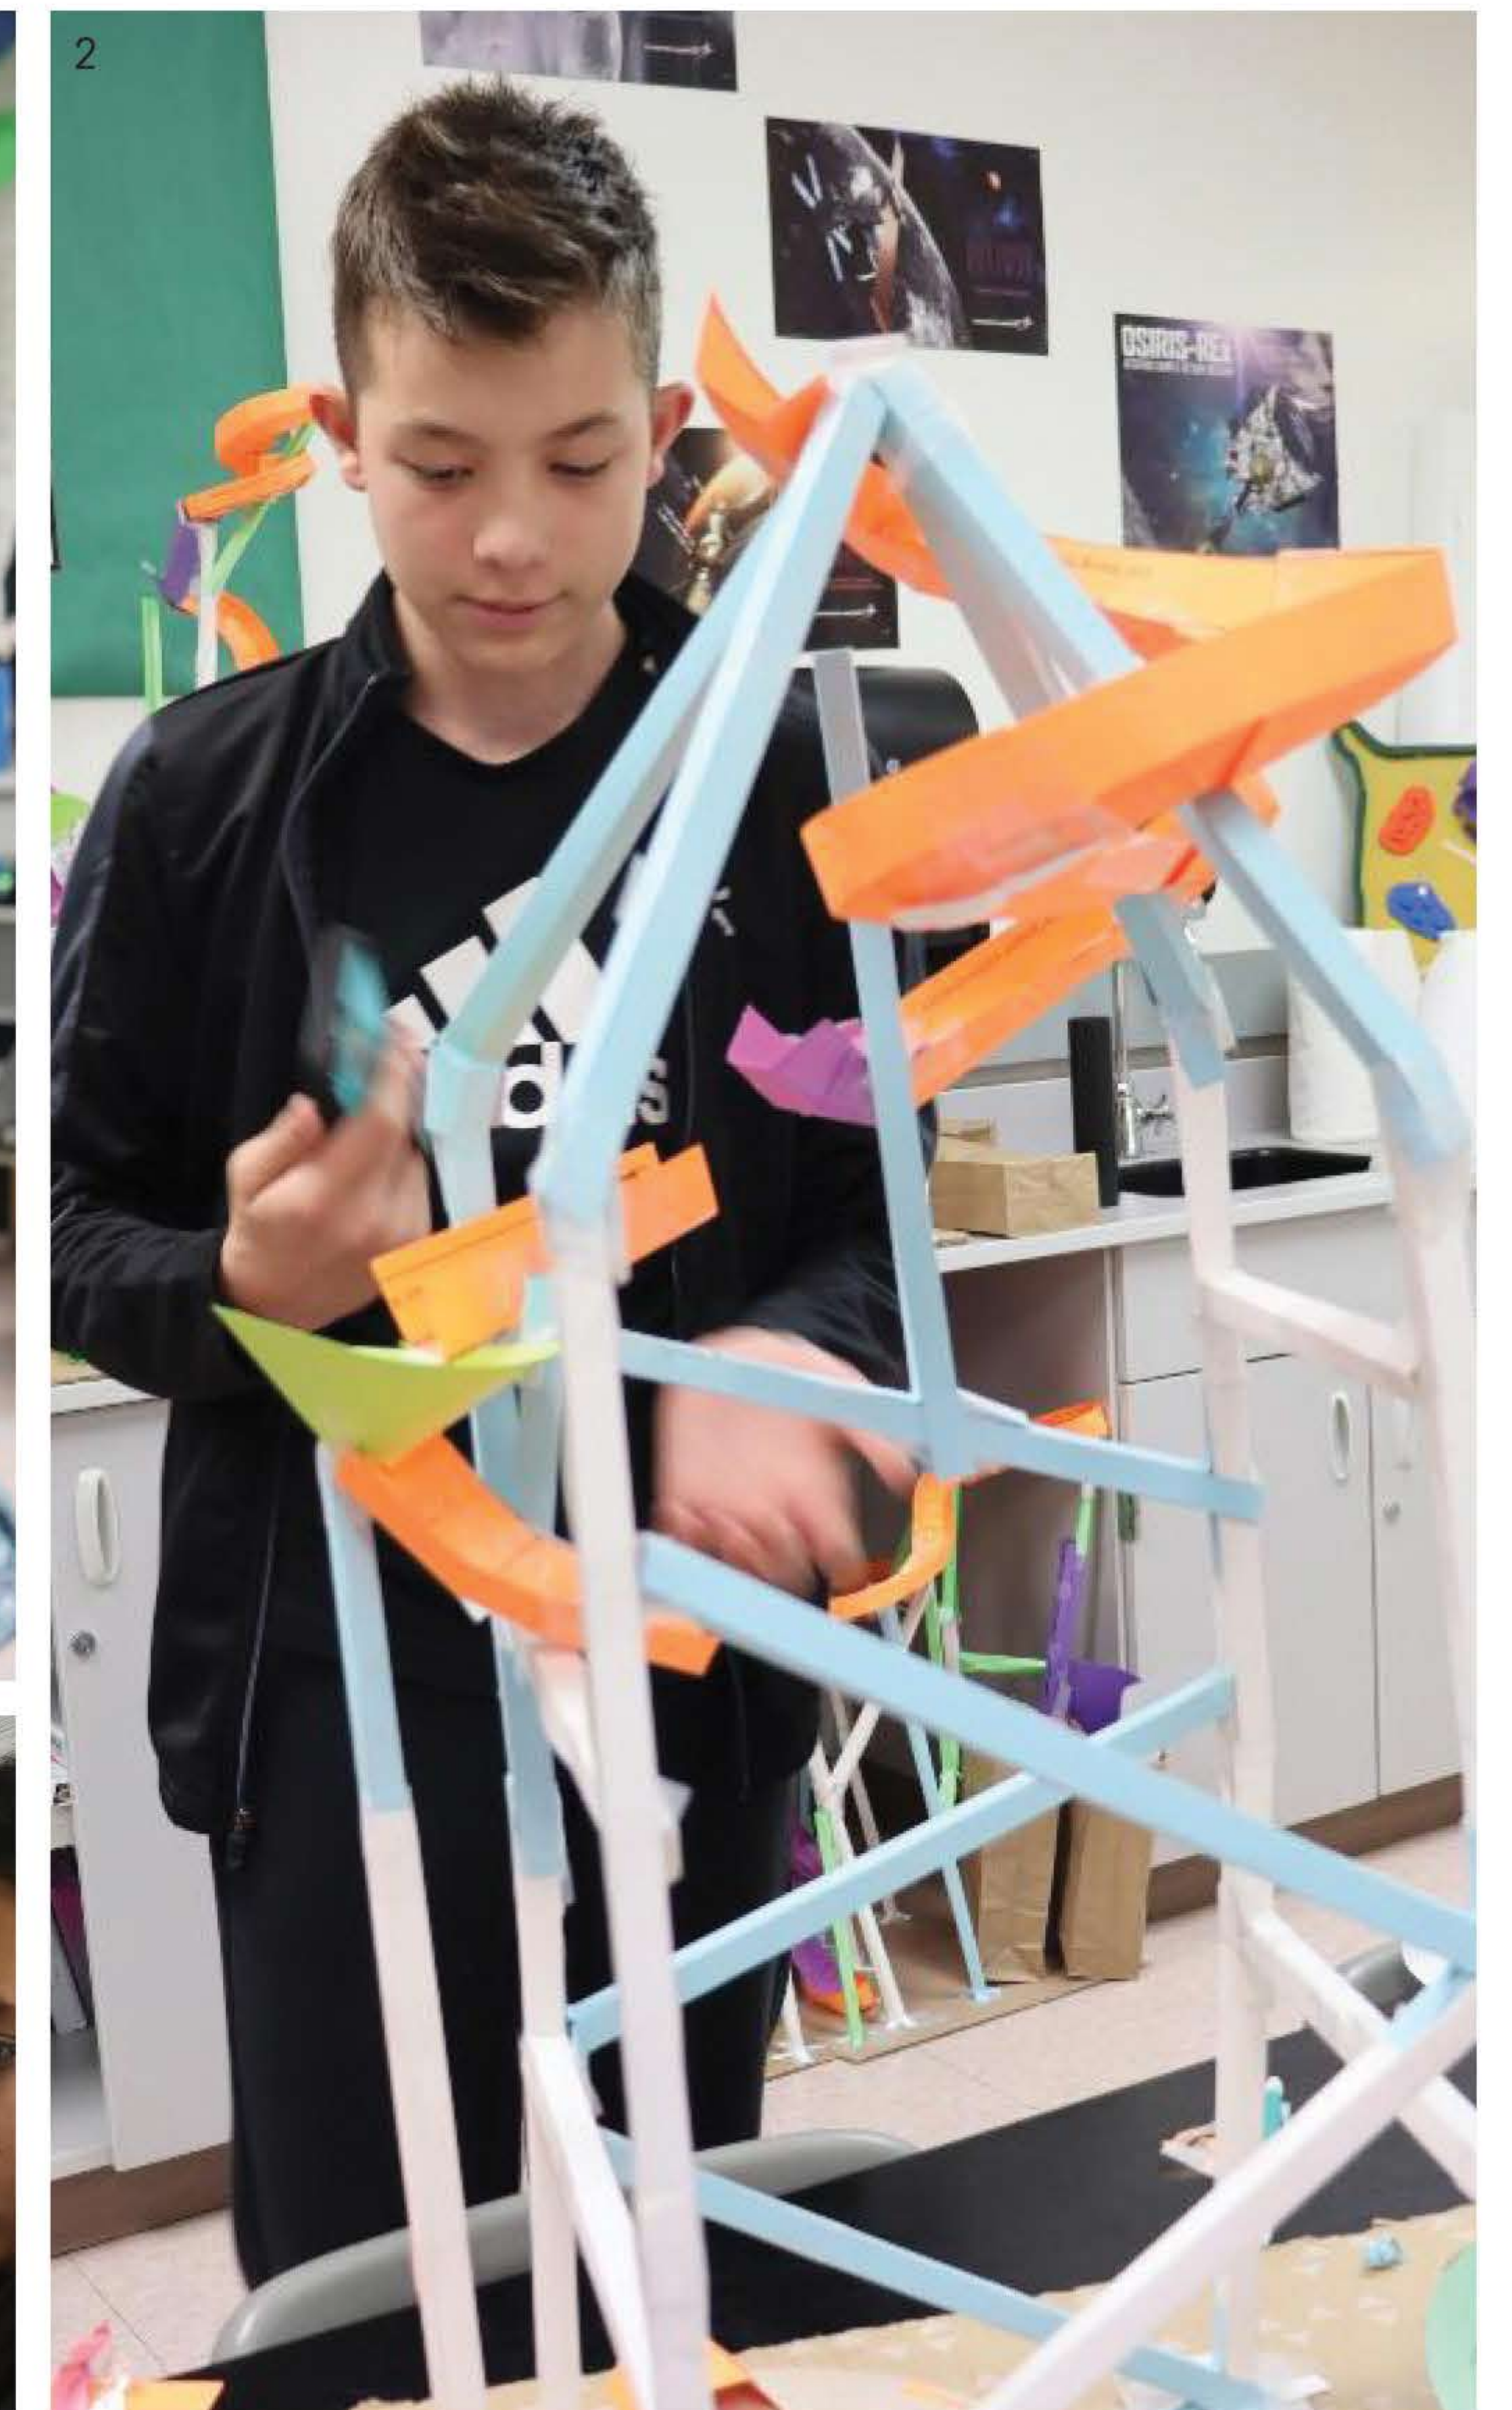

Ryder Nalick, 08

letting GRAVITY roll on down

by M. Easterling & K. Sparger

In Mr. Metzmaker's science class, the students were assigned to make a roller coaster out of paper and tape for a marble to go down. For the roller coasters, they were measuring mass, speed and the kinetic/potential energy.

1. In science, Brecken Coons, 07, is making a roller coaster out of paper and tape. The students' job was to make a roller coaster to explore kinetic and potential energy. "Creating and making it stand was the hardest part," Coons said. **2. Testing strength with marbles**, Santiago Maksymovich, 07, is testing the strength of his roller coaster with marbles. "Testing with the marbles to see how well it worked and seeing the different outcomes was my favorite part," Maksymovich said. **3. Holding it together** so it doesn't break, James Kuchler, 07, is holding his roller coaster together and supporting its weight so it doesn't bend and break. Even though his hands were hurting he just kept pushing through. "I didn't like it, I thought it was boring," Kuchler said. **4. Working together** with friends, Gabriela Grayson, 07, is with her friends for the science roller coaster they made. "I liked how it was really hands on and lots of teamwork. Getting to work with my friends was lots of fun," Grayson said.

“

My favorite part about multimedia was my friends. They made the class funny and we got along well and it was fun to work with them on assignments/projects.

Madison Pulciani, 08

”

filming CREATIVITY

1. Going out to film, Eli Lutz, 08, is being filmed by one of his friends. They are doing an assignment for multimedia that is worth a lot of their grade. "Making videos and being able to go out of the classroom to work on things with my friends was my favorite part," Lutz said. **2. Crossing classes** and creativity to make a story, Logan Mendlin, 08, is practicing with the green screen for a video assignment. The students got to use their own ideas to make a video for a grade. **3. Without much work**

outside of class, Kyle Sullivan, 08, is filming the morning announcements that are showed during 1st period. "I liked that there was no homework, I also liked making the morning announcements, music videos, and book trailers," Sullivan said. **4. Edwin Emmet, 07**, is filming a skit for a video assignment in class. The students got to use their own ideas and creativity for this assignment. "I liked that you could make anything you wanted as long as it was in school boundaries," Emmet said.
