Slang

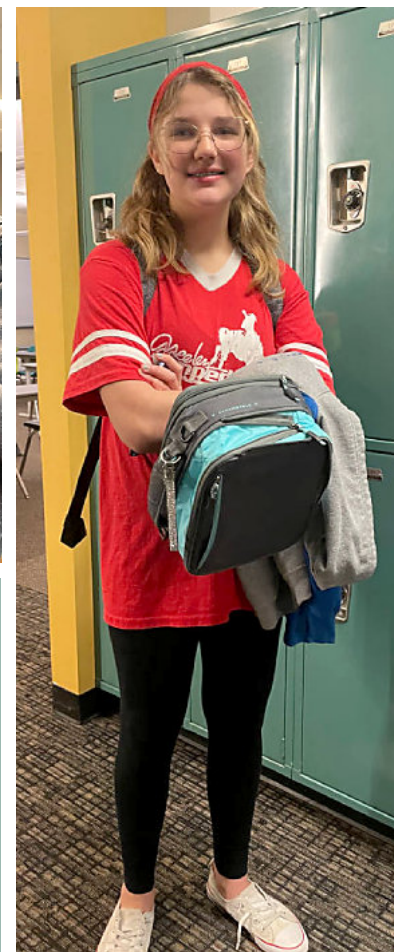

That Dang Slang! Students carry a very wide vocabulary of words including words that don't even exist in the dictionary. These new words, slang terms, are used fluently in students' conversations. **Ethan Noble** stated that his favorite slang words are, "Slay, dope, sick, and coolio." Each person has their own frequently used words. **Ella Fleming** shares some favorites with Ethan, but she said, "My favorite slang words are 'slay' and 'period.'" On the contrary, **Brynn Sorice** does not like the word slay and explained that instead, "I like to use 'period' and 'get it girl.'" Conversations become more interesting with the slang words that are being used.

What's your Sign?

Zodiac Season. Zodiac signs are growing in popularity and people like to see what characteristics they share in common with their sign. **Aria Vandewart** mentioned, "I am an Aries and I relate to some aspects of an Aries, but it doesn't particularly mean anything to me." On the other hand, **Jordan Leschuk** described, "I think that zodiac signs are really interesting. I'm an Aries and I feel that I'm self-determined and that I do a lot of things for myself and for others." Zodiac signs provide fun and curiosity towards finding out more about yourself.
