CHARACTER

It's easy to pick out these Dragons by their specialties.

THE ACROBAT

"It's kind of like a dance. There's different things called the apparatuses, and they hang from the ceiling and you do, like, different poses and stuff on them," Sunny Bolen (6) said while explaining what her hobby, aerial circus arts, entails.

Brenden Marquart (6) enjoys building and coding robots as a hobby. "I just recently got a Lego box that I build my own robots out of. It's intended to follow directions, but I build it myself. Then I use a code software to code them to do certain patterns and to solve certain problems," Marquart said about his hobby.

THE INVENTOR

"I enjoy doing art because I can express myself in my paintings or in my drawings," Mya Mullen (6) said when asked about why she loved her hobby. "My art teachers have been really awesome and have encouraged me to express myself in my art. I really like to sculpt because instead of creating a 2D image on paper, the project can really come to life."

THE ARTIST

THE READER

"I love reading because it's fun, I guess. I started really getting into it a while ago, and right now I'm reading *Among Us*," Brody Savo said when explaining why he can often be found buried in a book.
