

TECHNOLOGY

CODING, COMPUTER SCIENCE FOUNDATIONS, AND ROBOTICS

Vista Ridge offers a range of technology related classes including Computer Science Foundations, Coding, and so much more.

In computer science foundations students get to explore the world of computers and how they work, why they work and everything they can do. If you are interested in technology or a computer related class that will benefit you later in life, this is a great class for you.

In coding, students learn about computers and codes. Different codes make different functions work and in this class the students get to explore and learn what is possible with a computer.

Dominic Hebner, 12,
"In computer science foundations I learn a lot about computers and Mr. Hunt is very knowledgeable. I enjoy learning and having fun while doing it."

Rigoberto Hernandez, 12,
"In computer science foundations my biggest challenge in coding is learning the book. I enjoy learning things I don't always know."

Fischer Hamilton, 10,
"I enjoy coding, I find it challenging because some of the codes don't make sense. I like being able to apply what I've learned in coding."

Caleb Saccalan, 11,
"Coding is a good class because Mr. Hunt is a good teacher. It is a cool class and I learn a lot."

At Robotics competitions the members of the Robotics Team, The VRHS Cyber Wolves, compete against other teams throughout the state. The robots go through a specific course to achieve the most amount of points before the time ends. Each competition teaches the Cyber Wolves how they can change and improve their robot(s) to do better in the next competition. One of the best parts of the competitions is that the students are learning hands on and can take inspiration from the other schools.

Members of the Cyber Wolves, Vance Orders, 11, Lane Peters, 11, and Mark Goodwin, 11, work on their robot during competition and pose with their robot and trophy.

VRHS CYBER WOLVES

"MY FAVORITE THING ABOUT ROBOTICS IS SEEING THE ROBOT DEVOLVE AND CHANGE THROUGH THE SEASON."

- JAMES (VANCE) ORDERS, 11

"ROBOTICS IS A GREAT COMPETITIVE OUTLET THAT ALLOWS US TO USE OUR BRAINS AND CHALLENGE OURSELVES."

- RICHARD (LANE) PETERS, 11

"I LEARN ABOUT ROBOTS AND HOW THEY WORK. AND IT IS A FUN ENVIRONMENT TO BE WITH FRIENDS."

- GABRIEL GARCIA, 11
