**3. Science on Three!** This fun trio finds science fun, especially when learning about photosynthesis and all the other subjects. They don't just enjoy the class, but find it very hands on and a good class to have.

**4. Science Seminar** Eli Schwestka (8) in fact really enjoys science. She said that "I think that science is pretty fun, especially Ms. Poole. She is a great teacher and I love the lessons and the labs we do."

**5. New learnings** Lindsay Riepe (8) and Makena Grupp (8) love labs and being inquisitive. They enjoy weather labs and heat waves labs because they love learning about the new things it beholds.

**6. Examinations of Science** Ryan Barrow (7) really likes Mr. Shew "He's a really good teacher and explains things well", he says. It's for sure one of his favorite subjects and he loves learning about the examinations of science.

**7. Fascinating Discoveries** Emma Prochazka (7) really likes learning about the fascinating world of science, especially with Mr. Shew. She thinks that, "Mr. Shew is really nice." She also can't wait to do more.

**8. Cool Climate** Gabriella Greenhalgh (8) loves trying new things. She loves learning about climate. She says that "I think its interesting because we see our climate everyday and it will be interesting to learn all about why different things happen."

## Wonders of science

In Seventh grade science classes, they do all sorts of fun and exciting things. These 7th graders were doing an interesting experiment regarding photosynthesis and the other was dissecting a fetal pig. These future scientists have been really enjoying all things science and can't wait to learn more in the wonders of science.
