

TSA ALL THE WAY

On February 25, Technology Student Association members spent three days at the Denver Marriott DTC competing in STEM events at the state TSA Conference. Thirteen placed and made it to Nationals.

DRAMA CLASS

What is special about drama ?

"You get to express yourself in so many different ways."

Nathan Manske, 08

FINAL TOUCHES Putting the final touches on her video, Charlotte Jones, 07, works in Digital Video Editing. "I like the class because my friends are in the class," she said.

WHERE'S THE DRAMA?

8th graders get to take a new elective this year.

"I like acting because you get to be someone you're not normally."

- Emma Riley, 08

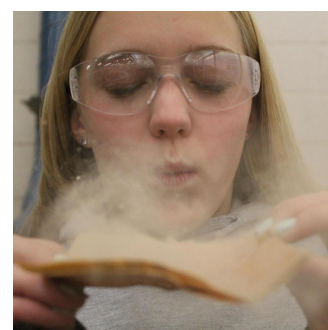

"I liked the lighting design project."

- Aiden Jordan-Mattison, 08

"We did a scene project in a shoebox."

- Guinevere Whorick, 08

ALL IN THIS TOGETHER In an intense game of Jenga, this group studies the tower plotting their next move. Photo by Ms. Milstead

HARD AT WORK Placing his catapult, Ben Schlachter-Todd, 07, competes at the conference. Photo by Ms. Milstead

BIG CREATIONS Trying to win, Max McKeegan 08, crafts his final project in the event Problem Solving. Photo by Ms. Milstead

STEM TO THE Future

STEM classes offer variety of activities and skills

In the halls of Euclid Middle School, two classrooms stand out from the rest: 1841 and 1945. Maybe it's because there is a big sign on the top saying STEM or it's the only room with six rooms, but it's most likely that the classroom is Mr Biddulph's.

The students in his class learn all about the world of Science, Technology, Engineering and Mathematics.

"He's very energetic and has a passion for his job," said Lilley Walford 08. Every day in the STEM classes, there's always something going on, from building cars that win races to making videos about the students of our school, the boundaries of knowledge are constantly being pushed in Mr Biddulph's classes.

Story by Annika Jaycox

FOCUS, FOCUS, FOCUS Showing 8th graders how to use equipment, Mr. Biddulph teaches one of several STEM classes throughout the day, including woodshop. "When a middle school student is working in the woodshop with a band saw, you will never see them more focused on a project," he said.
