new school year is all about being ready for what's to come. Whether it's through sports, academics, clubs, or extracurriculars, there is always a need to be ready. With this being the second year at the new high school, new traditions have been established and students are finding their place. Freshmen are entering the next four years of their life. Sophomores are beginning to find their way. Juniors are starting one of their hardest academic years. Seniors will begin preparing for the rest of their life. The big question is...

# Are You **E** For The Reds?

On August 16, 2023, EHS was back in session! Every year, the incoming freshmen, and outgoing seniors, are joined by their fellow juniors and sophomores at a first day of school assembly. Student council organizes and puts together games and interactive activities for the student crowd. Pam Holguin (12), a member of student council, introduced the game of Musical Chairs and asked for two volunteers from each grade, bringing 8 into the circle. Round after round went by. As more and more students were knocked out, the hope of winning filled the senior section. The band played, the crowd roared, and hearts pounded as the students and staff waited for the final round. Two remained: senior Garrett Garrison and junior Ryan Martinez. "I knew I was gonna win, I knew I could beat him strength-wise. The atmosphere was so awesome; so loud, and everyone was getting into it. I'm glad the new freshmen got to see what it is like to be an Eaton Red," said Garrison. The music started in the last round, the two began to circle...music stopped as Garrison rounded the corner of the chair, sitting down just in time to win by a hair as Martinez slid to the floor and the crowd went wild. This was the first, but definitely not the last win for the Class of 2024.

# Are You **E** To Achieve?

Whether it's a class such as personal training or a college level history class, the classes you take will help to determine your four years of high school. It may be a class that you're required to take or one that just sounds fun cause your friends are in it. Most of your teen years are spent within the walls of the school. Some people will find their passions within these walls and classes that will help decide their futures.

# Are You **E** to Take Action?

"Take Action" is the new theme that the EHS administration implemented this year. According to Principal Jessica Grable, "We felt like it was time for no more excuses and taking action. I shared the belief and our "why" with the staff in August before students arrived. We've asked them in several situations (with data, students, and behaviors): What are we going to do about it? How can we take action?" Grable believes that a theme for each school year "helps people feel like collectively they can accomplish something. We've had a theme every year since I've been the principal at EHS." Grable makes sure to set a clear example of what she wants to see in our school and 'walks the walk' for students and staff daily. Pushing everyone to take action daily in situations, such as the "See something, Say something" campaign launched by our administration.

# Are you **E** to begin?

As freshmen enter the building these new students have to adapt to many things. Most have to ask themselves if they are ready to begin this new part of their lives. The transition from eighth grade to freshman year can be jarring for some; with new teachers, grading systems and schedules. While eighth grade and freshman year are comparably different, freshman Olyvia Walpole said, "I guess like the one thing that kind of surprised me was how much it was like middle school. I mean, there was a little more homework when it came to the *Hunger Games* stuff but yeah, it was pretty easy to do." The class of 2027 is one of the largest classes to walk the hallways of Eaton High School.

# Are You Road **E**?

Sophomore year is full of new things, the biggest being able to get your license to drive when you turn sixteen. Getting your license comes with a lot of responsibility and is a big step toward becoming an adult. Sophomore year is also the midway point along the high school journey and a point when many students in the Class of 2026 start to become leaders at Eaton High School.

# Are you **E** to Discover?

Junior year is a year that has a mix of everything. Junior year is the year of transformation. It is the year in high school where students find themselves and get a new type of confidence and can face any challenge that comes at them. Many juniors would say it is the most academically challenging year in high school. "Junior year is like bench. You struggle for the max, but if you take it easy and use your resources you can and will prevail," said Teagan Smith (11).

# Are you **E** for your future?

The final year of high school. Four long years and that's it. Seniors are beginning to prepare for the rest of their lives. Whether it's going to college, straight to employment, or enlisting. For some seniors, senior year has been a piece of cake. But for some others, it has been a challenge. Seniors are focused on finishing their credits and classes to meet graduation and college requirements. It may only be an elective credit, or it could be a college class. It all comes down to finishing strong to earn that diploma.

## AROUND THE WORLD

Remi Grasmick (11)

"I went on a cruise to the Dominican Republic, Haiti, and Costa Rica. I also went to Universal Studios."

Jack Dalton (12)

"The best part about traveling for me is being in a new place that could function and feel very different from what I'm use to."

Aedy Barclay (12)

"The best part about traveling is seeing new places and experiencing new adventures. Exploring and meeting new people is part of growing and builds confidence."

Kaci Paulus (10)

"The best part of traveling is getting to see all these cool places that you don't normally get to see. As well as being able to see different cultures."

Colombia

Egypt

Mount Kilimanjaro, Tanzania

Mexico

Egypt

Jordan

## EPIC ADVENTURES

Kennedy Scudder (12)

"A cool experience I had on vacation was traveling to Cabo for the first time. It was fun to travel around the city and do some shopping and hang out with my family."

Evelyn South (10)

"The trip was really fun, had a lot of hard work, and was super hot and humid since it was in Florida!"

Aralee Rinebarger (12)

"The best part of our trip was finding an amazing ice cream shop that was a block away from our hotel. We went EVERY night during our trip. It was the best part of the trip, along with being able to spend time with my team."

# WORLD TRAVELER

## TRAVEL WITH GRIFFIN

Egypt

A trip away from home is just what some people need over the summer. Maybe it's just a trip to the mountains, to your family's home town, or similar to Spanish teacher Aleena Griffin, taking trips all over the world! According to Griffin, she has traveled "to almost 40 countries with my husband, we will hopefully get to our 40th country together on his 40th birthday this summer." Planning a trip can be stressful but getting to the airport has another level of stress so most people get to the airport early. Griffin said she arrives at the airport "at least 2 hours early no matter what" and that she "always [takes] a carry-on to keep traveling simple." What does she look forward to during her trips? "I like going to the local markets and buying foods and seeing art I can't buy or see anywhere else," said Griffin. But when it's time to travel back home, "to not want to come home!" is the hardest part about leaving said Griffin.

## VACATION MODE

### TRIP TO CANCUN

Vacation can be the best when you travel with family, you can do so many activities with the people you know and love. Dean Grable went parasailing, snorkeling and on a power boat excursion with his family in Cancun last summer. Although planning the trip can be far away you always look forward to having fun. Grable looked forward to the ocean, the sun and "relaxing and enjoying the wonderful weather." His favorite memory was "hanging out with family by the pool."
