

BAKING FOR THE TAKING

AFTER THE BAKE SALE, STUDENTS REVIEWED WHICH OF THE TREATS WERE THEIR FAVORITES

PHOTO BY NOAH SENDRAK

"I bought peanut butter Rice Krispie treats and some sugar cookies. Out of the two, I really liked the peanut butter Rice Krispies better and I wish I'd gotten more if I came better prepared with more money. The peanut butter Rice Krispies were a solid 9/10, and were very good." ETHAN O'REILLY '25

"I was one of the curators for the bake sale. It was very successful this year because we made a profit of \$363. The most popular thing we sold was mostly cookies but especially the brownies, they were a hit." GIANNA SMITH '25

"I didn't buy anything because I brought some sugar cookies to sell. I don't know how many I made, but one of my friends really liked them and bought all of them before anyone else could get to them. He spent like \$30 on all of them. I got to try them before they were all bought and I'd give it a 9/10. I feel like I could've done better on the icing and made it less like liquid." KRYSTAL BRAITHWOOD '26

GENTLE HANDS: Splashing around, Kelsey Milner '25 gently pets the rays with two fingers. After the self-guided tour through the aquarium, students were taken behind the scenes to see how the aquarium functions. "We learned more about each animal and how they feed off of each other in the ecosystem," Milner said.

AQUATIC BIOLOGY VISITS THE AQUARIUM

WE OTTER GET GOING: Posing with an otter, Vivian Mann '24 observes the exhibit at the Denver Aquarium on Feb. 28. The field trip was intended for the students to make connections between class material and the real world. "I learned so much about the animals and the different species they have are cool," Mann said. "The otters were definitely my favorite part."

identifies the type of fish. Dallman plans multiple trips each year. "I see species I didn't see before every time I go. It's pretty sweet," Dallman said. EYE OF THE TIGER: Studying the tigers with her peers, Arslan Nuriyev '24 takes notes about the exhibit and observations. Each student was responsible for filling out a guided packet. "I liked the tigers. They were playing with the little cube in the water," Nuriyev said.
